Inglenook Trim Kit

BLACK

**BRUSHED
STAINLESS
STEEL**

**STAINLESS
STEEL**

Features

- 3x trim pieces
- 1100mm length
- 40mm width
- Corner pieces
- Can be cut to size
- Made from steel

3 Easy Steps on how to install the Inglenook Trim Kit

- 1 - Cut the Raw Steel Angle Frames to the size of the opening and attach to the opening with Heatproof Adhesive
- 2 - Cut the Finishing Trims, ensuring the cut line is at the top of the opening, again to the size required and attach to the Raw Steel Frame with the Magnets provided
- 3 - Cover the cut line on the Trim with the 2x Square Blanking Plates

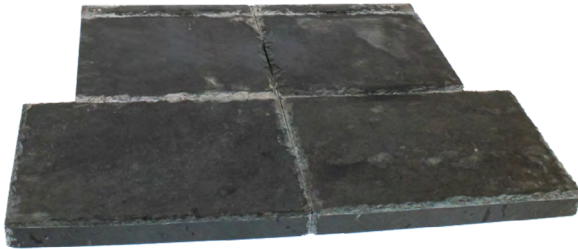

With such a varied range of hearths, we make it easy for you to create a truly unique fireplace.

We offer a variety of hearths in many shapes and sizes, suitable for use with all fuel types.

Height	Width	Depth
1000mm	1200mm	12.5mm
2600mm	1200mm	12.5mm

Kemwell FPL fireplace lining calcium silicate board is a safe, robust and lightweight chimney breast lining system for cassette and inset fireplaces and stoves. Kemwell FPL calcium silicate boards can resist continuous high temperatures up to 1000°C and are dimensionally stable during and after heating. This reduces the risk of cracking which would negate the fire-resisting properties of other boards. Their high thermal storage capacity also ensures that heat is evenly distributed within a room.
